DELFT, 17th September 1976

Dear Dr. Kuehni,

Enclosed I send you the abstract of my paper for Color 77. I am still working on my publication for JOSA, but it is nearly finished.

Detailed tables of the comparison results will then be available. Moreover a compilation of the data regarding the new VVVR experiment is prepared, which will be made available on request.

I wonder whether this development will have any effect on the present situation.

Yours sincerely,  
Fibre Research Institute TNO
