

# Inter-Society Color Council

December 20, 1974

Mr. Rolf Kuehni  
Verona Division  
Baychem Corp.  
P. O. Box 385  
Union, New Jersey 07083

Dear Rolf:

The technical program of the 1975 ISCC Annual Meeting on Tuesday afternoon will be the responsibility of the Problems Committee. I visualize something like this:

1. The work and organization of the Problems Subcommittees - How they are established, etc.
2. A brief history and some of the results of the work of previous Problems Subcommittees.
3. Presentation of a particular Problems Subcommittee's work which may be of particular interest.

I believe it would be very much appropriate for you to present a talk (about 30 minutes) on your Subcommittee's activities and in particular your fine work on color difference.

I wonder if you can give me your thoughts and reply immediately so that I will be able to inform the Board of Directors about this at their meeting in January 1975. Please call me at (716) 458-1000, Ext. 77827.

With best wishes for the holidays, I remain

Sincerely,

Franc Grum

FG/sss

The aims and purposes of ISCC are to stimulate and coordinate the work being done by various societies, organizations and associations leading to the standardization, description and specifications of color by these various societies, organizations and associations, and to promote the practical application of the results to the color problems arising in science, art and industry.
