Union, N. J. 07083

Dear Rolf:

I plan to publish the weights in "The Clemson University of Review of Industrial Management and Textile Science". I am sending you a copy of the submitted manuscript.

In your booklet I hope you mention the fact that I calculated the first colorant formulations, before computers were invented. The results were published in American Dyestuff Reporter 33 1 (1944) and the mathematical method published in the Journal of the Optical Society of America 34 112 (1944). It is my one claim to fame.

Best regards,

E. I. Stearns
Head - Textile Department
